

## PRETTY HOME MAY BE BUILT CHEAPLY

DESIGNED BY C. K. HOWELL.

The design presented herewith is treated in Spanish and requires a lot of at least fifty feet frontage, and to be set back at a considerable distance from the street. The effect sought is a square composition, very simple in line, and avoiding all ornamentation except the useful features, such as the projecting chimneys and the iron balconies. The chimneys are placed on the outside principally to economize space and for picturesque effect; the front porch is deeply recessed in building and projects as shown.

The balconies are provided for comfort, and prevent what, without them, would be the unwholesome effect in the facade. The building throughout is of stucco making the whole color scheme most effective, a pigment being added to the stucco in order to give the natural color of the building, with a brilliant green roof, covered with shingles, having a deep brown of all exterior wood work. The chimneys are covered with rough cast, which are surrounded with red clay pots. The interior arrangement is most excellent, with large airy rooms, extending from one end of the house to the other, which presents an excellent opportunity for light and ventilation. The living room occupies one-third of the floor, and the dining room, which is of a soft green-brown color. The floor is of soft green-brown color. The floor is of soft green-brown color. The floor is of soft green-brown color.

The dining room is also finished in green wood, which is stained a deep, rich green. The walls are hung with blue canvas to the height of moulding, running on a level with the top of doors and the trim to the ceiling of straw colored canvas, with a stenciled design in green, the ceiling shows rough plaster between open beams. The main hall contains an ornamental stair case, the hall is separated from the living room by an arch supported on columns. The bathroom is connected with the dining room, the kitchen is fitted up with sink, stove, and a large store-room, connects with the outside porch. The kitchen is provided with stairs leading to basement and second floor. The second floor contains four large bed rooms, with ample closets, servant's room and bath room. Throughout this floor the rooms are finished in white

enamel, with doors matching the hall, which contains the same scheme as that of the first floor. The floors are of soft green pine, stained brown, and the walls may be either tinted or hung with Japanese group cloth, the color scheme to be adapted to the special rooms. The fire places of the second story are built of brick, with wooden shelves supported on brick corbels. There is a large attic, the storage place, which completes the sufficient measure for comfort ensured in other parts of the building. There is a cement cellar, and it contains heating apparatus, coal and wood bins, and a store cellar. The house is lighted with gas and electricity. The house is simple and refined in appearance, and built in a thoroughly modern manner, although its cost is small, being approximately forty-five hundred dollars.

## New Enterprises in Virginia and Carolina

From the Manufacturers' Record.

## Virginia.

**Berkeley, Va.—Marine Railway.**—The Norfolk Marine Railway Co. will start organization during the week with G. P. Hudson, of Norfolk, Va., president, and Joseph M. Lawrence, of Berkeley, Va., secretary. The company is to build a large marine railway plant, including a 100-foot slipway in Berkeley wharf on Norfolk harbor, the wharf about 100 feet on the harbor line. It has two marine railways, one operated by electricity and the other will be in a few weeks, also a large and modern machine shop and foundry. The erection of a third marine railway is contemplated in the near future. It is proposed to remove the construction of large, iron large and small, and to repair work to vessels built at iron or wood, making repairs to hull or machinery. Address all communications for the present to J. M. Lawrence, manager, Norfolk Marine Railway Co., Berkeley, Va. John L. Roper, of the Norfolk Marine Railway Company, is interested in the new organization.
